Love Never Loved Me

Geri Halliwell

Tout l'heure mon amourI live for love and all it brings

The heart it heals, the song it sings

The sweetest kiss, the warm embrace

Will melt the ice before it breaksNo matter what I do, no matter what I say

What can I do when nothing stays the same?

It's written in the stars, the story ends the same

Everything changesLove never loved me

Love left me out in the cold

Love never loved me

Love gave up on me, after allI've taken chances, set them free

I've taken back virginity

I've been adored, I've been the one

I've broken hearts, I've had my funNo matter what I do, no matter what I say

What can I do when nothing stays the same?

It's written in the stars, the story ends the same

Everything changesLove never loved me

Love left me out in the cold

Love never loved me

Love gave up on me, after all You can't break a heart that's already broken

You can't steal a heart that's already stolen

And what doesn't kill me, is making me strong

I'm ready for loveLove never loved meYou can't break a heart that's already broken

You can't steal a heart that's already stolen

My greatest desire is to love and be loved

'Cos I'm a believer, I'm not giving upAnd what doesn't kill me, is making me strong

I'm waiting, I'm willing, I'm ready for loveLove never loved me

Love left me out in the cold

Love never loved me

Love gave up on me, after allLove never loved me

(Love never loved me)

Love left me out in the coldLove never loved me

(Love never loved me)

Love gave up on me, after allLove never loved me

(Love never loved me, loved me)
