

# Levitate

## I Mother Earth

Feel heavy  
Once felt it hard Question an answer  
For a thousand days  
Give birth to the earth  
Then let it drift away Open and flow  
Just swinging forever  
Making love to the ground  
Because it just feels better It ain't easy  
Drink it in  
Think a while, spit There's both shining and darkness  
Yet they share a day  
Was there a man on a cross  
Or was it just a fake? Even in shame  
You can't hide your growth  
Though the butterfly flies  
He's sinking like a stone The killing sun  
It hurts my eyes and comes hard  
Onto my skin  
And as I find shade From tree to tree, I live to learn  
To dig down deep  
I feel the pain  
And love the hurt, I don't complain Trancing in the grass  
Suck it off the world  
When you're full of [unverified] shrug  
Feel fortunate Then go where levitation lives  
Where aggravation grows  
Where sleeping's too hard  
On the thinking bone Intensity is what I need  
To suffer for the pleasure  
It's heat, hard, life and death  
Living all together In a small room  
Full of me and my friends  
Trying to find the means  
To justify the end
