Last Chance to Breathe

Spoken

Nine years in the making
And still there's no end in sight
Sometimes understood by so few
Sometimes not understood at allYou helped us through it all
And so we sing with you
Straight to the depths of your heart
To light up the places that you've
Never had the courage to go aloneThis could be the last time, last time to breathe
This could be the last time, last time to breathe
This could be the last time, last time to breathe
This could be the last time, you help us through it all
This could be your last time to breathe
