# What If

## Natural

When Everyone talks and nobody listens
The message is harder to hear
If nobody bends, something gets broken
And somebody pays with their tears
If we never reach out,then no one comes in
How can we change what is
(Chorus)
What if we did what hearts are for
Opened up every door
We could be so much more
What if we give more than we take
What if we don't turn away
We'll never look back and say,what if
If we were one road,how far could we travel

And where would this journey lead
If we were a mountain as tall as forever
I wonder how far we could see
If we only reach up and never look down
A dream is as close as a wish
(Chorus)
We try to find the answers beneath the wisdom tree
When love alone will lead us to everything we need
When we don't know where to go,maybe we already know
(Chorus)
