# Embrace

## C-Systems

I'm holdin' you
I don't know what you want
I don't hear what you said
Truth behind the lies
'Cause I can't see what's in your head
And spread your wings and fly
Out in a brave new world
Let this be my prayer
To keep you safe when I'm not there
Can we love and live apart?
I don't know, no, I don't know
How can we divide the heart?
I don't know, no, I don't know
And when the night falls, and when the sky falls
I long for your embrace
And in the cold night, under the street light
I long for your embrace
Livin' separate lives
I have faith in you, away from you
Like a lonely child
I will hang on every word
Embrace
Through the mists of time
Lovers can be friends
The power of the human heart
The secrets in the souls of men
All my blessings in disguise
I don't know, no, I don't know
Reunited we will rise
I don't know, no, I don't know
And when the night falls, and when the sky falls
I long for your embrace
And in the cold night, under the street light
I long for your embrace
Livin' separate lives
I have faith in you, away from you
Like a lonely child
I will hang on every word
And when the night falls, and when the sky falls

I long for your embrace
Another daybreak, another heartache
I long for your embrace
Livin' separate lives
Away from you
Embrace
Embrace the lonely, lonely, lonely, lonely, lonely, lonely life
Lonely days and nights
We can live our life
Embrace
Embrace with our separate lives
Embrace, embrace
The lonely, lonely lives
Lonely days and nights
I will never send away
Embrace, embrace
The lonely, lonely lives
Embrace the child inside
The lonely, lonely lives
