

# Love The Way

Shy FX

Baby, come inside you'll never know what you might find.  
Maybe you'll find that there are better days if you leave these days behind.  
So baby take my hand and let me show you, let me show you Cause I love the way you love the way I love you  
And I love the way you love me too  
And I love the way we take away each other  
Into places that erase away our thoughts, our cares, our dreams or scares  
And I never want to let you go  
Because I love the way you are So Baby, you live and learn, you crash and burn, and c'est la vie  
But it's crazy to me, you'll never see, no you'll never see what you mean to me  
But baby take my hand and let me show you Cause I love the way you love the way I love you  
And I love the way you love me too  
And I love the way we take away each other  
Into places that erase away our thoughts, our cares, our dreams or scares  
And I never want to let you go  
Because I love the way you are
