

The Messenger

INXS

Look around, give your eyes a new adventure
What you see is a mix of past and future
Your moment is coming Hold on, hold on
How you gonna be when tell the story?
Everything we took, was it from each other?
Hold on, hold on It's too late to get around it
Say goodbye to how we found it
This is what we least expected
Don't you put the blame on the messenger I've seen the flames that lick at survival
Check your dreams into the Justice Hotel
Your moment is coming Hold on, hold on
How you gonna be when tell the story?
Everything we took, was it from each other?
Hold on, hold on It's too late to get around it
Say goodbye to how we found it
This is what we least expected
Don't you put the blame on the messenger Hold on, hold on
How you gonna be when tell the story?
Everything we took, was it from each other?
Hold on, hold on How you gonna be when tell the story?
Everything we took, was it from each other?
Hold on, hold on It's too late to get around it
Say goodbye to how we found it
This is what we least expected
Don't you put the blame on the messenger It's too late to get around it
Say goodbye to how we found it
This is what we least expected
Don't you put the blame on the messenger It's too late to get around it
Say goodbye to how we found it
This is what we least expected
Don't you put the blame on the messenger
Come on
