Promises

Nonpoint

Sleepless nights like the days are long feel the chill of your words when the sun is gone
The sun is gone
You got me stumbling round life just singing a song
Telling tales of my failures my trust is gone
My trust is gone'Cause when you're looking at our future
Tell me what do you see
Do you see room to breath
'Cause when I see our future only thing that I see is promises you won't keepPromises, promises
Nothing but broken promises
Everyday, promises
Fair weather, promises
No matter where look our go I find the opposite
In this around this is nothing but broken promisesSo give it a rest
I need to get this if my chest
You see it's going on inside of my mind for some time
Playing with me
And it's impossible for me to breath
So when our stories come in their due time
You'll have yours and I'll have mine
'Cause it ain't working like the way you said it would
So what you gonna make this timePromises, promises
Nothing but broken promises
Everyday, promises
Fair weather, promises
No matter where look our go I find the opposite
In this around this is nothing but broken promisesTell me the point of giving me hope when you know you're just gonna take it away swallowing the words that are making you choke..
So why you spitting out all the words that you sayPromises, promises
Nothing but broken promises
Everyday, promises
Fair weather, promises
No matter where look our go I find the opposite
In this around this is nothing but broken promises
