

# Something Good

## Wheatus

Cocaine eyes, been living a lie

Looks like another big night on the credit card, baby

But you're makin' 'em smile, yeah, you're drivin' 'em wild

I could sit back and let you do all the talking now, couldnt I? I'm dropping 'round just you pretend that you dont  
hear me though

And I can be just what you need and you would never know

You're way too busy playing DJ on the stereo

But you dont spin it like I feel it though The center of my mind is a dark place

That wishes it wouldnt do what it would

(Do what it would)

And every mistake that I ever made

Saying I didnt do what I should

(Do what he should) And if you wanna see me smilin

You're gonna have to

(Do something you never)

(Do something you never)

You never would The bigger the size, the better the prize

Gonna get yourself a big bad life you's a cool kid aint cha?

But you still got the style that makes the company smile

You just sit back and let 'em do all the talking now, dont ya? You and your crew can shovel shit down at the  
money show

Sign for your life and they will get you on the radio

Check out the line around the block and say I told you so

But you dont play it like I feel it, no The center of my mind is a dark place

That wishes it wouldnt do what it would

(Do what it would)

And every mistake that I ever made

Saying I didnt do what I should

(Do what he should) And if you wanna see me smiling

You're gonna have to

(Do something you never)

(Do something you never)

Play something good The center of my mind is a dark place

That wishes it wouldnt do what it would

The center of my mind is a dark place

That wishes it wouldnt do what it would The center of my mind is a dark place

That wishes it wouldnt do what it would

And every mistake that I ever made

Saying I didnt do what I should And if you wanna see me smiling

You're gonna have to  
(Do something you never)  
(Do something you never)  
You never would
