

# Trenchfoot (Smokey Joe EP)

## Leatherface

I smell the bullshit like trenchfoot on your breath  
You're the disease they call 'we're sick to death'  
A personal friend of Mr. Sydney James you say  
Oh no not now please go away  
And we all lived to start a war and I don't understand anymore  
And we've all lived in times of war and I don't watch these things anymore  
I hear sounds coming forth from your full mouth  
I don't believe what's coming out  
You're telling me you've done more than any man alive  
Jesus Christ how flies thrive  
And we all lived in times of war and I don't understand anymore  
And we all lived to start a war and I don't watch these things anymore  
And we all start a war and I don't understand anymore  
And we all lived to start a war I can't watch these things anymore  
Nobody listens to a single word you say  
Nobody turned up when they heard you were dead  
You feared attics cause they were dark  
But now you fear Manson fear Marx  
And we all lived in times of war and I don't understand anymore  
And we all lived to start a war and I can't understand anymore  
And we all lived to start a war and I don't understand anymore  
And we all lived in times of war and I can't watch these things anymore  
Complimentary "Trenchfoot" Ringtone
