# When the Night Comes

## Primal Fear

This night I died a thousand times
I had some doubts, saw into her eyes
Her gypsy heart just beats in pain
I hold her hand, we walk through the rainI'm standing here, she's standing there
I can't get her out a my mind
I call her name, she's acting strange
This could be the last timeWhen the night comes
It's so unreal
When the night comes
It's just a dreamWe fight against our deep desires
Her energy can set a heart on fire
What comes around just comes around
She looked into the palm of my handShe would not tell this hidden spell
I can't get her out of my mind
She won't reply, the last goodbye
It was the last timeWhen the night comes
It's so unreal
When the night comes
It's just a dream
When the night comesWe fight against our deep desires
Her energy can set a heart on fire
What comes around just comes around
She looked into the palm of my handWhen the night comes
It's so unreal
When the night comes
It's just a dreamWhen the night comes
It's so unreal
When the night comes
It's just a dreamWhen the night comes
When the night comes
