Revolution

Crematory

They'll never stop our will to live
Free from pain and fear
They cannot bring us down, all you're geared
Go out and justify the revolutionA beginning of the age, to start revolution
Now break and leave their cage, time for revolution
Take those traitors away from us, let's start revolution
Giving back belief and trust, so live the revolutionThis reign of fear built of not ending empty promises
Strange liars old betrayers 'cause they've failed the aim
There's just one world we live in, justify the revolutionA beginning of the age, to start revolution
Now break and leave their cage, time for revolution
Take those traitors away from us, let's start revolution
Giving back belief and trust, so live the revolutionTeaching mankind to fight each other, never again
But would you like to kill your brother? Never, never againA beginning of the age, to start revolution
Now break and leave their cage, time for revolution
Take those traitors away from us, let's start revolution
Giving back belief and trust, so live the revolutionRevolution, it's time for, so start a and live the revolution
it's time for, so start a and live the revolution
