

# Revolution

## Crematory

They'll never stop our will to live  
Free from pain and fear  
They cannot bring us down, all you're geared  
Go out and justify the revolutionA beginning of the age, to start revolution  
Now break and leave their cage, time for revolution  
Take those traitors away from us, let's start revolution  
Giving back belief and trust, so live the revolutionThis reign of fear built of not ending empty promises  
Strange liars old betrayers 'cause they've failed the aim  
There's just one world we live in, justify the revolutionA beginning of the age, to start revolution  
Now break and leave their cage, time for revolution  
Take those traitors away from us, let's start revolution  
Giving back belief and trust, so live the revolutionTeaching mankind to fight each other, never again  
But would you like to kill your brother? Never, never againA beginning of the age, to start revolution  
Now break and leave their cage, time for revolution  
Take those traitors away from us, let's start revolution  
Giving back belief and trust, so live the revolutionRevolution, it's time for, so start a and live the revolution  
it's time for, so start a and live the revolution
