

# Long After I'm Gone (Acoustic Unplugged)

## Big Kenny

Had a rusty hot rod on a country road  
And a John Deer tractor with a radio  
Just a long haired farm boy with jukebox dreams  
Hit the town on weekends just to blow off some steam  
You know what I mean Yeah, the years roll by, the world don't stop  
And all these memories are all I've got  
But the love I leave in my wildest dreams will live on  
Long after I'm gone, long after I'm gone Well, I hug my babies and I kiss my wife  
Don't take for granted a single breath of this life  
And I count my blessings each and every day  
Because tomorrow you know it just might be too late  
I know what I say That the years roll by the world don't stop  
And all these memories are all I've got  
But the love I leave in my wildest dreams will live on  
Long after I'm gone, long after I'm gone
