## Limp

seen it all before not like this not my trip this is what i saw saw the =  
lot of you doing things saying things and in front of me you didn't seem =  
to care who was there what was heard it affected me wash my hands of you =  
over this this is through this is what i mean by now you've moved on i =  
assume still alone with that attitude now you find yourself by yourself, =  
on your own with a big ego no one there to feed what you need give you =  
peace and or anything i need something good something else this is =  
through this is what i mean it pours out of you and into me
