From the Start

Ryan Cabrera

Tell me what you need, you know it's on your mind
You say he's usually screwin' up your life
He's always gone when you need to talk
It's just so wrong, I wish you wantedLove, is it enough?
I'll be your shelter when the weather is rough
And now, you should let go
I'd let you love me like I was in your heart
Just trust like I was there from the startI'll tell you what you need, a man more like me
It's not a fantasy, you can't have everything
You can be loved and it's time you know, girl
You've had enough, I wish you wantedLove, is it enough?
I'll be your shelter when the weather is rough
And now, you should let go
I'd let you love me like I was in your heart
Just trust like I was there from the startSo much left just look
It's time you leave, yeah yeahOh, is it enough?
I'll be your shelter when the weather is roughLove, is it enough?
I'll be your shelter when the weather is rough, yeah
And now, you should let go
I'd let you love me like I was in your heart
Just trust like I was there from the start
