

Heaven, How Long

East India Youth

The larian awakening
On my trip to the evenings
In undiscovered carnivores
Shopping for pharmaceuticals
In light of all that there is around me
There's something clear and cold about me I scrape my head against the grey sky
All sparks and ...twists and rides
Go to the blue and play your parts
I cannot give less than my heart
In spite of all the love inside
There is a question I've been asking
