

# Till the Morning

## Witness

I cannot read minds and it's taking its toll  
I might leave in an ambulance but I will leave in control  
And they won't recognize me, not one single one of them  
    No, they won't see me going or coming back again  
No, they won't see me going or coming back againSo shine out a light  
    Then I can see where I'm gonna go  
        And take the chill out of night  
Until the morning helps me outI cannot read minds and nobody will speak  
    It's all getting older by the week  
        So swing on a hinge, construct a joint  
            Rotate round at fixed points  
Rotating around at fixed pointsIt wasn't right  
    But then the energies work for me  
        They took the chill out of night  
And let the morning help me outWell, I cannot read minds so give me a line  
    And I will act it out in real timeA fear is warm and cities burn  
        If you can't be fair at least be firm  
            Some must leave, others return  
And everybody's got a lot to learnSo shine out a light  
    Then I can see where I'm gonna go  
        And take the chill out of night  
Until the morning helps me outSo shine out a light  
    Then I can see where I'm gonna go  
        And take the chill out of night  
        Until the morning helps me out
