

Follow And Feel

Saosin

Don't let them know
You're watching the situation crumble
These things, they take time and they know
Yes, they know they should be better now
She's watching me awkwardly from a distance
Should I care?
Is there something more I should have known?
I know that I wonder
They took his crown
There's nothing more left of him now
I appreciate, now that they choose to ignore
I can set her free to go without a payment
She's watching me awkwardly from a distance
Should I care?
Is there something more I should have known?
I know that I wonder
Will she go or follow?
Follow, please follow me home
Follow, please follow me home
This won't end like last time
The things you swore
They never made me feel anymore
She's watching me awkwardly from a distance
Should I care?
Is there something more I should have known?
I don't need to wonder
