

I Feel You

3 Doors Down

They gave me a life that's not so easy to live
And then they sent me on my way
I left my love and forgot my dreams
I lost them along the way Those little things you say
When words mean so much
You never back down and they all shy away
You always listen to me And what do I get to get me through these sleepless nights?
And what do I have to hold when no one's there to hold me tight?
And what do I see the only thing that gets me through?
This is what I feel and I feel you And this ain't no bed of nails then I'd rose just the same
God this road sure can be long
Another endless day, another seven hundred miles
That'll take me further from my home Those little things you say
When words mean so much
You never back down and they all shy away
You always listen to me And what do I get to get me through these sleepless nights?
And what do I have to hold when no one's there to hold me tight?
And what do I see the only thing that gets me through?
This is what I feel and I feel you I know what you're goin' through now
Believe me I live this And what do I get to get me through these sleepless nights?
And what do I have to hold when no one's there to hold me tight?
And what do I see the only thing that gets me through?
This is what I feel and I feel you
