Do What You Do

Cute Is What We Aim For

No one is telling me the speed I should be traveling
So watch me take the lead
No one is telling me the speed I should be traveling
So watch me take the lead, yeah, yeah
There is an engine in my body
With every beat, it lets me breathe
There is a machine within my body
If I can keep up with that machine that's in my body
Well, I can do anything, be anything, say anything
I can feel the beat within my body
If I gave up on it, could I catch myself?
Have you ever been fake?
For the sake of saving face
You can work, you can play
From the cradle to the grave
Doesn't matter what they say
Have you ever been fake?
For the sake of saving face
You can move as you make
From the cradle to the grave
Doesn't matter what they say
Quick, quick, quick, come fix me up
I need to make my move
This damn machine doesn't work the way that it used to
But that's what I get for taking it for granted
I never even meant it, never even meant it
That's what I get for taking it for granted
I never even meant it, never even meant it
If I gave up on it, can I catch myself?
Have you ever been fake?
For the sake of saving face
You can work, you can play
From the cradle to the grave
Doesn't matter what they say
Have you ever been fake?
For the sake of saving face
You can move as you make
From the cradle to the grave
Doesn't matter what they say

No one is telling me the speed I should be traveling
So watch me take the lead
No one is telling me the speed I should be traveling
So watch me take the lead
No one is telling me the speed I should be traveling
So watch me, watch me take the lead
Have you ever been fake?
For the sake of saving face
You can work, you can play
From the cradle to the grave
Doesn't matter what they say
Have you ever been fake?
For the sake of saving face
You can move as you make
From the cradle to the grave
Doesn't matter what they say
Doesn't matter what they say
