I Can't Understand

Air Traffic

So come on down and let it out
Walk me through the corridors of fear
It's not a dream without a doubt
You try so hard to shut the feelings outI lie awake and watch the stars
A cry so far from where we are
And in the haze of shattered light
I break from the chains and drift into the night'Cause I can't understand what's going on
I can't understand what's going onAnd now it seems so long ago
We talked for hours and missed the last train home
But are we weightless being blown
Far from the heart and far from all we've known?'Cause I can't understand what's going on I can't understand what's going onYou said our love transcends this life
Now I know it's true
I cut my hands and close my eyes
