Lets Talk About Us

Van Morrison

We talked about the birdies
That fly up in the trees
We talked about the moon
And the stars we couldn't see
But you keep on pretending
You don't know what's wrong with meCome on, let's talk, about usWe talked about the good times
That made us laugh and sigh
We talked about the bad times
That brought tears to our eyes
Now, I think it's about time
For you to realizeCome on, let's talk, about usHey
Dear, I swear I'll love you, 'til the very end
But I don't plan on stickin' around
If it's just to be your friendWe've talked, and talked, and talked, and talked
But there's been nothin' said
The things that you've been talkin' about
Just don't stick to my head
Sometimes I think, little girl
That your heart is filled with leadCome on, let's talk, about usWell, dear I swear I'll love you, oh, 'til the very end
Well, I don't plan on stickin' around
If it's just to be your friendWe've talked, and talked, and talked, and talked
And there's been nothin' said
The thing that you've been talkin' about
Just don't stick to my head
My darlin' little girl
I think that your heart is made of leadCome on, let's talk, about us
Come on, let's talk, about us
Well, well, well, well, well
Come on, let's talk, about us
