

Hunters of the Night

Mr. Mister

He's a lean and hungry hunter, on the street tonight the fire's bright
She's in his sights
She's a lonely little dancer, out to find a daring new romance
The girl takes a chance They're hunters of the night, find their love where they might
We're all hunters of the night
Yeah She can see her lonely stranger, standing in the cold street corner light
There in the night
She can feel his arms surround her, wanting this embrace to never end
Still once again They're hunters of the night, find their love where they might
We're all hunters of the night
We're all hunters of the night See the lean and hungry hunter, standing in the cold street corner light
There in the night
She can feel his arms surround her, wanting this embrace to never end
Still once again They're hunters of the night, find their love where they might
We're all hunters of the night We are hunters, we all hunt the night
Findin' love wherever they might
Yeah We're all hunters, we're hunters of the night
We're all hunters of the night
We're all hunters of the night
