

You and I

Hey Marseilles

Forget about the reasons why
Sixteen years came and went
Dancing through the summer nights
We built a love without the cost
Slow storm screaming on
Landslides of what's been lost You and I always thought we knew
I always wanted you, I wanted you
Holding on's what got us through
I only wanted you, I wanted you
Forget the endless interstate
No sleep with stolen kids
Two years in the North Cascades
Remember secrets we would keep
Passed on in winter nights
Whispering with the dust of sleep You and I always thought we knew
I always wanted you, I wanted you
Holding on's what got us through
I only wanted you, I wanted you
If you breathe, breathe slow
These bones take their time to grow
I know I only want her to survive
Come on over
