

# Baby Eskimo Kisses (electric)

## Trophy Scars

The way you'd close your eyes  
Your lashes against mine  
The way you used to smile  
I'd bite my lip and smile  
The light was baby blue  
And I'd take care of you  
And our baby too  
I would marry you  
The glacier looked so sweet  
We said we'd never leave  
You said it must be fate  
You found your soul mate  
Now I think too much  
"I don't drink enough,"  
And then I drink too much  
I don't think enough  
So go and roll your eyes  
A paradox; you'd like  
To think that you're right  
Well, you're right, alright  
You'll stay forever tonight  
You'll stay forever  
When you left that day  
I thought you'd be back again  
"She's my baby girl;  
she'll come back I'm sure"  
But Jerry don't you know  
That she's not yours to hold  
She could hold you back  
One more drink, one more heart attack  
Jerry what'd you do?  
Cause now you're losing you  
Why would you lose that ring?  
Rachel really loved you  
Rachel really loved you  
Now I think too much  
"I don't drink enough,"  
And then I drink too much  
I don't think enough  
So go and roll your eyes  
A paradox; you'd like

To think that you're right  
Well, you're right, you're right, you're right, you're right  
You'll stay forever that night  
You'd never leave that night  
You'll stay forever alright  
Guess you'll stick, soft; sex  
Losing words for you  
And when you're kissing him  
I hope he gets the same  
You'd never leave Now we're getting married  
That baby's on its way  
Her name would be Quinn  
It's hard not to pretend
