## Marathon

## **Kelis**

Love is this marathon I'm running for you baby And you don't know me yet but faith is all I have See and I'm gonna win this race Love is this marathon I'm running for you baby And you don't know me yet but faith is all I have See and I'm gonna win this raceSince I was a little girl My eyes were fixed on you I knew that one day we'd meet And that you could set me free Sure diamond rings are pretty things But piece of mind can be all mine All this burning love affair has kept Me on my feetLove is this marathon I'm running for you baby And you don't know me yet but faith is all I have See and I'm gonna win this race Love is this marathon I'm running for you baby And you don't know me yet but faith is all I have See and I'm gonna win this raceYesterday I had a glimpse of you You looked me in the face And just they other day you brushed right by me I felt you reeling in my space So tell me do you think of me And can you see from the stars? I swear I said I'd wait for you But fate might change the startLove is this marathon I'm running for you baby And you don't know me yet but faith is all I have See and I'm gonna win this race Love is this marathon I'm running for you baby
