

# Name

## Preternatural

Seven days old in the ICU tonight  
Little baby boy, they don't wanna have to say goodbye  
Your mother's on the phone, your father's in the hall  
    Praying God save his life  
    He sees you, He's near you  
    He knows your face, He knows your pain  
    He sees you and He loves you  
    He knows your name, He knows your name  
Four doors down there's a man who just won't wake up  
He crashed so hard and the doctors wanna pull the plug  
    Your wife is by your side, saying not tonight  
    Praying God'll just show up  
    He sees you, He's near you  
  
    He knows your face, He knows your pain  
    He sees you and He loves you  
    He knows your name, He knows your name  
Maybe you're alone in the corner of an empty house  
Or maybe you're the one no one notices in the crowd  
    He sees you, He's near you  
    He knows your face, He knows your pain  
    He sees you and He loves you  
    He knows your name, He knows your name  
    He knows your name  
    He knows your name
