

What Is Left to Solve

Rogue Wave

I tell you all my thoughts
you've got me feeling naked
I give you all my trust
And your proceed to break it
Illuminated by my digital replacement You get so involved
What is left to solve
You just nod down far
So what is left to solve
Mirror mirror,
Can you feel structural weakness?
Run in circles
Running faster than the preakness
Them all Christmas thoughts
Or in ex cars their windows facing in You get so involved
But what is left to solve?
You just nod down far
So what is left to solve
What is left to solve So if your hands are God
What is left to solve?
if everything's my fault
What is left to solve?
What is left to solve?
You get so involved
But what is left to solve?
You're just nod down far
So what is left to solve?
What is left to solve?
What is left to solve?
