Nothing to Hide

Geoff Moore & The Distance

Everybody's thinking about self-esteem
On talk shows, Oprah knows she read it in a magazine
'Cause we don't like ourselves so much
We just need to feel the touch
Of someone who'll accept us in our needNothing I have said or felt or done
There's nothing that can keep me from God's love
He will take me as I am
He's got a thing for runaway lambs
And there is mercy in His bloodWe've got nothing to hide, nothing to loose
Nothing to fear, and nothing to prove
He loves us just the way He made us
And no matter how high, no matter how low
No matter how far we still have to go
He loves us just the way He made usEverybody's talking about true success
Cashing in, psychic friends, what to eat, how to dress
But I refuse to play that game
My rules have forever changed
I will live in wonder in freedom in His restWe've got nothing to hide, nothing to loose
Nothing to fear, and nothing to prove
He loves us just the way He made us
And no matter how high, no matter how low
No matter how far we still have to go
He loves us just the way He made usHe can't love you more
He won't love you lessNothing to hide, lose, fear, or ever prove
Nothing to hide, lose, fear, or ever proveNothing to hide, nothing to loose
Nothing to fear, and nothing to prove
He loves us just the way He made us
And no matter how high, no matter how low
No matter how far we still have to go
He loves us just the way He made usNothing to hide, nothing to loose
Nothing to fear, and nothing to prove
He loves us just the way He made us
And no matter how high, no matter how low
No matter how far we still have to go
He loves us just the way He made usNothing to hide, nothing to loose
He loves us just the way He made us
