Vagabond

Wolfmother

Oh girl, I don't know all the reasons why I found the answer looking in your eye I go out walking all day long Take away this lonely man, soon he will be gone 'Cause I'll tell you everything about living free Yes, I can see you girl, can you see me? You don't need to know what I do all day It's as much as I know watch it waste away 'Cause I'll tell you everything about living free Yes, I can see you girl, can you see me?Go and see the sorcerer and look into the ball You may find the answer written on the wall The left one was a dancer Can you see the answer, oh? Put her on a mansion on top of a hill Please don't make her do the things against her will I found something special, I don't know why Looking into her pretty little eye 'Cause I'll tell you everything about being free
