Sleepy Head

Toby Johnson

We'll fight the fire we're the flames we've walked this road before we'll walk the road again the horizon Was blocked with haze, I fell vacant like a letter with no resting page I have no idea where I'm going not in memory's of where I've been she lives in a house full of glass and I keep throwing stones at her window, away from the wars and the sick she's alone and she sleep alone solo

We've got sleepy heads she says to me we have a city on our doorstep and a set of feet to keep me, high in the cloud over the busy streets I'm in love when my eyes are open when I'm asleep my dreams take over yeah

I feel the future and how it's told someone loves me will I die with no heart and souls, I'm drowned in emotions beneath the heavy stones I care for people although I have my own broken bones, I have no idea what I'm doing not a memory of where I've been in playing with fire and I don't give a damn for the outcome I walk with a skip in my step cos I know one day ill become someone

We've got sleepy heads she says to me we have a city on our doorstep and a set of feet to keep me, high in the cloud over the busy streets I'm in love when my eyes are open when I'm asleep my dreams take over yeAh
