Something To Die For

Carolina Liar

Peel me off the hook, that's something to die for
Heal me, help me see what the hell did I lie for?
I'm fighting private wars again, just second thoughts of where and when
So peel me off the hook, that's something to die for
Won't you see it in your heart? You should
Know you always played your part real good, oh yeah
That's something to die for, that's something to die for
Well you know me I never learn, I'm holding onto sacred words
So peel me off the hook, that's something to die for
Won't you see it in your heart? You should
Know you always played your part real good
If it hurts I'll be there, we'll be standing by the shore
You"ll see how the waves wash away all the dirt
That's something to die for, that's something to die for
Won't you see it in your heart?
Don't you know you played your part real good?
So won't you see it in your heart? You should
Should know you always played your part real good
In the end I'll be there, I'll be standing by your side
We will see how the tide hides away all the dirt
That's something to die for, that's something to die for
