Walk Through the World

Marc Cohn

I'm writing you this letter from some old hotel
I can feel the distance between us
From the Spanish Steps to the liberty bell
I know the Angels have seen us seen us, baby see us, babyThey see you down on Seventh Avenue
While you're just hanging by a thread
And I'm sitting in a lonely room without a view, baby
Wishing I was there with you insteadWon't you walk through this world with me?
Walk through the world
Over the miles of mystery
Walk through this world with meI'm staring out across the rooftops, baby
I've seen the writing on the wall
Heard a little bit of thunder, at the Seventh Wonder
But everything is bound to rise and fall, that's allWon't you walk through this world with me?
Walk through the world, yeah
Over the mountains and the shining sea, yeah
Walk through this world with me, walk on, walk on, walk on
Walk on, yeah, walk, walk, walk yeahLet me get this ringing out of my ears
Let me get these stars out of my eyes
'Cause I just want to look back over all the years
With you right there standing by my side, could you justWalk through the world with me?
Walk through the world
Over the miles of mystery
Walk through this world with meWalk through the world with me?
Walk through the world
Over the mountains and the shining sea, yeah
Walk through this world with me, yeah come onWalk through the world
Walk through the world
Walk through the world
Walk through this world with me, come on baby
