Crash and Burn

Lifehouse

All these lights are catching up to me
I just can't put insomnia to sleep
I close my eyes but all that I can see
Is someone who I'm never gonna be
I hope that you can bring me back
I gotta to make it rightAnd if I fall and crash and burn
At least we both know that I tried
And as I crawl those lessons learned
Yeah they remind me I survived
Yeah, yeah, yeahSilence just keeps screaming back at me
The ones I love are lost in memories
And I wish that I could take back what was done
You can only change the person you've become
I have to try and find a way
To leave it all behindAnd if I fall and crash and burn
At least we both know that I tried
And as I crawl those lessons learned
Yeah they remind me I survived
And I've been hurt and I've been scarred
At least I know that I'm alive
And If I fall and crash and burn
At least we both know that I triedAll of the things I tried say
All of the words just got in the way
I'm waiting here, I need your help
Don't leave me down here all by myselfAnd if I fall and crash and burn
At least we both know that I tried
And as I crawl those lessons learned
Yeah they remind me I survived
And I've been hurt and I've been scarred
At least I know that I'm alive
And if I fall and crash and burn
At least we both know that I tried
