Together Now

Neneh Cherry

Into the morning
Got me through the night
I've seen the light
I see the light
I live of what I need
I've got greed
I've been a sinner for as long as I know
So help me understand
The little that I know
Shadow dancing with my spirit
Got to face your demon on your own
Take my body and put it through the dust
I've been buried in the crust
Together now
So help me understand
The little that I know
Together now, together now
It's us now, it's us now
And there's them, and there's them
And should we start again
Together now, together now
It's us now, it's us now...
The descendants of christ
And it's you
Will you help me I'm confused
What you gonna do
With the little that I know
With the little that I got
We're together now, we're together
It's us now
And there's them, and there's them
And should we start again
Together now, together now
It's us now, it's us now...
