

Cynical

Enter The Haggis

Depleted uranium is used on the ends of bullets
And on the ends of shells because it is so hard
Almost any armament is vulnerable

To something that is tipped with depleted uraniumIn the cities and towns of Afghanistan

In the heart of the Balkans, the heart of Iraq

Not your Grandfathers style of deadly munitions

Its silent and deadly years after the missionDepleted uranium is a war crime

Depleted uranium is a war crimeGonna cut through their armor, then cut through your lungs

If you make it home alive, youll still die young

A greedy gang of liars, yeah, weve seen it all before

A moneymaking scheme led by war-profiteering whoresDepleted uranium is a war crime

Depleted uranium is a war crimeThey were throwing it away

Until they figured out they could use it for armamentHalf-life, 4.5 billion

Half-life, youll waste away

Half-life, 4.5 billion

Half-life, youll waste aWeve heard their lies before and we know theyre lying again

Feels like a deja vu of Agent Orange and Vietnam

Weaponry so sadistic, it is hard to comprehend

War profits surge with every breath by Uncle SamDepleted uranium is a war crime

Depleted uranium is a war crime

Depleted uranium is a war crimeWe went to a hospital in Southern Iraq

And a woman was there with a very deformed child

And her husband had been in the Iraqi Army

And had been in the battles in Southern Iraq

And came home and they produced a baby

That was, very severe malformationsBoth the Leukemia rates in children

And malformations at birth had increased by six hundred percent

And it was clearly an epidemic where all this DU had been dumped

It becomes a dust that can be inhaled

And infect the blood stream and the rest of the bodyAnd it was the opinion of the doctors there

That this was caused by depleted uranium

They simply saw this as being a direct result

Of the war by the United StatesHalf-life, 4.5 billion

Half-life, we waste away

Half-life, 4.5 billion

Half-life, we waste awayHalf-life, 4.5 billion

Half-life, we waste away

Half-life, 4.5 billion

Half-life, we waste awayThe doctor said, Women at the time of birth

Dont ask if its a boy or a girl, they ask, 'Is it normal?'The military denies first and then after the evidence builds to the point

Where they can no longer deny, then they do the research

Thats what happened in the Vietnam era around Agent Orange

And I suspect and Im worried that thats what will happen this time
