

Yesterday

[Debelah Morgan](#)

Who's gonna love me, baby? Who's gonna hold me now?
Kiss me tenderly and rub my body down
Make love by candlelight, keep me warm at night
I can't believe all you left me in memories As I lay here, baby, wishing you're here with me
And you were touching me, making my body scream
How could you leave me, baby, with all these memories?
Tell me what the hell am I supposed to be feeling now? Baby, you're so fine
You're always on my mind
I think about you all the time
Don't you know I love you so?
I never wanna let you go, baby
'Cause I still remember yesterday I still remember yesterday
You took your love and went away
And now your love is just a memory
I still remember yesterday I rehearse in my mind more than a thousand times
This broken melody that reminds me
I cannot tell a lie, I kept you satisfied
But no one could ever come close to you with me Baby you're so fine
You're always on my mind
I think about you all the time
Don't you know I love you so?
I never wanna let you go, baby
'Cause I still remember yesterday I still remember yesterday
You took your love and went away
And now your love is just a memory
I still remember yesterday Oh, you're so fine
You're always on my mind
I think about you all the time
You're so fine
