Panic Mode

Flight Case For Sushi

In a minute
this train is moving on ward
so get in line
or get left behind
the conductor closed his doors
(now we're off)
in a minute
this train is moving east bound
and noones ever coming back
thats sad but its the way it
some times goes
in a minute
these light will all be upside down
and noones getting out
(so dont mean what you say)and hit panic mode in 24 seconds
till we over load
and every thing around you
can happen in an instant
you close your eyes but you feel the surprise
in panic mode
take every thing in
and then it all explodes
every thing around you can
break down this condition
i guess thats how it sometimes goeswell this story was all but told
like kerosean it burns your soul
so keep it on the inside track
like thats a fact
i know
i won't scratch
wont break
the surface
this line temps fate
and this the obvious one
one kiss sweeter than makeup
one last wish
and this all makes sence
(this all makes sence)and hit panic mode in 24 seconds
till we over load

and every thing around you
can happen in an instant
you close your eyes but you feel the surprise
in panic mode
take every thing in
and then it all explodes
every thing around you can
break down this condition
i guess thats how it sometimes goesPlease forgive all trespasses
finding questions with no answersthis was my hope
this was my every thing
now this wont change
no matter what
nomatter if the innocent ask whyand hit panic mode in 24 seconds
till we over load
and every thing around you
can happen in an instant
you close your eyes but you feel the surprise
in panic mode
take every thing in
and then it all explodes
every thing around you can
break down this condition
i guess thats how it goesand hit panic mode in 24 seconds
till we over load
and every thing around you
can happen in an instant
you close your eyes but you feel the surprise
in panic mode
take every thing in
and then it all explodes
every thing around you can
break down this condition
i guess thats how it sometimes goes(hit panic Mode in 24 Seconds till we over load
panic mode)
