That's What I Need

SWV

I need someone who I can share all my dreams with
That's what I need
Someone special, who will love me just for me
And that's what I needI need someone to hold me tight
To give good loving all night
So many times I've opened up my heart
Only to have someone tear it apart, that's why I needSomeone to treat me right, make love all through the night
That's what I need
I've been hurt before, real love, I'm looking for
That's what I need, real loveI need someone who will never leave me lonely
That's what I need
Someone faithful, who'll love me as their one and only
That's what I needI need someone to share my ups and downs
And even through the bad times, will always be around
So many times I've opened up my heart
Only to have someone tear it apart, I needSomeone to treat me right, make love all through the night
That's what I need
I've been hurt before, real love, I'm looking for
That's what I needSomeone who will treat me right
Make sweet love all through the night
Someone who'll love me for me
A real love, that's what I needSomeone to treat me right, make love all through the night
That's what I need
I've been hurt before, real love, I'm looking for
That's what I needSomeone to treat me right, make love all through the night
That's what I need
I've been hurt before, real love, I'm looking for
That's what I need
