All for You

Arthur Walwin

Ill talk for hours and stay up all night with you, with you.
Ill do the things that make you smile at me, just for you, for you.
Now Im singing songs in keys that I cant reach, about you, about you.
And I played your favourite song on repeat all day and weve been singing it aloud all night.And if you were a melody,
Id save all my favourite chords for you and sing it softly; sing it all for you, my ingenue. And all I want is one more night to prove that no ones ever loved you like I do.So lets curse the distance that's between me and you, and you.
And it keeps tearing me apart, but still I'll hold you close, Girl don't forget that you're my sweetheart.And if you were a melody,
Id save all my favourite chords for you and sing it softly; sing it all for you, my ingenue. And all I want is one more night to prove that no ones ever loved you like I do.This is love, this is ours, this is all for you.And if you were a melody,
Id save all my favourite chords for you and sing it softly; sing it all for you, my ingenue. And all I want is one more night to prove that no ones ever loved you like I do.
