

The Car In 20

The Early November

If I just think about it, I'm always wasting time
applying cream to this.
It never stops the itching, the burning cracking skin
and I have had enough of it
We are the most challenged of friends
Taking what we need to live
But I will fall with one more pull or pluck of this
Pray for the time, I've got my mind, set, pay for the seats

I've got to see the way we pull through
We are the most shallow of friends
Taking what we want to live
But I will fall with one more pull or pluck of this
Anybody got a second wind for a tired man with a broken gift
Anybody got a second chance for a man giving up on it
