Early Night

Luluc

Out in the early night
before dark has taken over
Waiting on a melody to uncover
a way I can say what's been troubling me for a while at leastTearing up a new road
stars slowly coming to life
The whistle of a breeze sounding in the leaves
I better make it back before the darkness plays a trick on meSometimes I don't see what's right in front of me
Yet I keep moving faster trying to find the key
You elude meSing a song hum as I go
One will lift me up, another I can go so low
I try to make my way gently
It's easy to confuse a sweet sounding memorySometimes I don't see what's right in front of me
Yet I keep moving faster trying to find the key
You elude meSometimes I don't see what's right in front of me
Would you hold me close and tell me all I need my dear is right here
