Come On

Noah Young

I was buried underground. There was no sign of life
Until she came around
I was buried six feet down. But my heart was revived
I'm finally alive
And I'm just getting started
Yeah I'm just getting startedCome on come on come out dancing with me
Because the summer I want is just a summer where we
Stay up every night dreaming holding you in arms
My favorite place in the world is with you under the starsYou make it way to easy for me to lose my mind
And I can't find enough time with you no, not enough time
You got me up in the clouds and got me singing out loud
I adore this this girl. I adore you girlCome on come on come out dancing with me
Because the summer I want is just a summer where we
Stay up every night dreaming holding you in arms
My favorite place in the world is with you under the stars
Come on come on baby don't let me fall
My forever will suck if you're not here through it all
Because I was dead until the day you said hello
I know how it feels to live and I'm not letting goAnd it's not easy
I'm not breathing
Baby here's my heart
So take it take it and make it make it
Beat again so I can live with you with youCome on come on come out dancing with me
Because the summer I want is just a summer where we
Come on come on come out dancing with me
Because the summer I want is just a summer where we
Stay up every night dreaming holding you in arms
My favorite place in the world is with you under the stars
Come on come on baby don't let me fall
My forever will suck if you're not here through it all
Because I was dead until the day you said hello
I know how it feels to live and I'm not letting go
Come on come on come out dancing with me
Because the summer I want is just a summer where we
Stay up every night dreaming holding you in arms
My favorite place in the world is with you under the stars
Come on come on baby don't let me fall
My forever will suck if you're not here through it all
Because I was dead until the day you said hello

I know how it feels to live and I'm not letting go
