Where Do I Go from You

Jon Secada

Empty sky where the stars used to be
They shine for everybody else, don't shine for me, no
Since you went away
Ever since you took your love away from me
(Rainbows fade)They fade to black and white, baby
No, it's never gonna be the same
The same without you in my life, girl
'Cause you were the best thing I ever had
I'll never find another love like that
So tell me, tell meWhere do I go from you?
A lonely street is where every road
Is gonna lead me to
Oh, what do I do with these blues, baby?
I wanna know, where do I go from you?I should've took the time
To show how much I care
Should've realized just what I had
When I had you thereI let you get away
Should've never let you get away from me
(I miss your smile)
I wish I was with you, girl
I regret the day I threw away
The sweetest heaven ever found, baby'Cause you were the best thing
I ever had, yes you were
Where do I find another love like that?
So tell me, tell me baby, yeahWhere do I go from you?
A lonely street is where every road
Is gonna lead me to
Oh, what do I do with these blues, baby?
I wanna know, where do I go from you?'Cause I keep wonderin' what I'm gonna do
'Cause I could search every place
But I'll never find someone
To take the place of you
No, it's just no use, it's just no use
Where do I go, baby? Tell me please, babyWhere do I go from you?
A lonely street is where every road
Is gonna lead me to
Oh, what do I do with these blues, baby?
I wanna know, where do I go from you?Where do I go from you?
A lonely street is where every road

Is gonna lead me to
Where do I go from you?
