

What You Love

Olivia Holt

I'm so mad, so mad at you
I swear you do it just to watch me go off
Even half, a world from you
You find a way to get my blood running high You'll have warming me up
I'll have shutting you down
Like we're trying to get even
Look at us now
Going at it again
And again and again
'Till we all out of reasons
I heard them say You can walk through fire
And you'll still come out alive
What's gonna kill you Is what you love, what you love
Is what you love, what you love
Is what you love, what you love
Is what you love, what you love
Is what you love, what you love What did you drag, drag me into?
I keep on falling fingers passing the blame
But I'm just as bad, as bad as you
Yeah it's half my ego, half all my shame You'll have warming me up
I'll have shutting you down
Like we're trying to get even
Look at us now
Going at it again
And again and again
'Till we all out of reasons
I heard them say You can walk through fire
And you'll still come out alive
What's gonna kill you Is what you love, what you love
Is what you love, what you love
Is what you love, what you love
Is what you love, what you love
Is what you love, what you love I'm so mad, so mad at you
I swear you do it just to watch me go off Is what you love, what you love
Is what you love, what you love
Is what you love, what you love
Is what you love, what you love
Is what you love, what you love Is what you love, what you love
Is what you love, what you love

Is what you love, what you love
Is what you love, what you love
