

Of Moon, Blood, Dream and Me

Vader

Another Enochian theme is inspired by A. Crowley's book bearing the same title, where the Beast recorded what he saw and heard during the desert operations in 1909. The visions constitute almost a complete map of the Astral, including the most unreachable Regions of the Spiritual. Each vision literally sparks with intensity of expression that is powerfully impressive even to the uninitiated and profane. The influence of "Vision and the Voice" can be clearly seen in all occult masterpieces Crowley wrote after 1909, for its content summarizes the Arcanas of all mystical, mythological, and religious emblems.
