

Gotta Have Love

Capital Lights

In this world, it's all about who you know
And I know someone that's out of this world
So all my doubts and worries that could bring me down
Are in His hands, so mine are still You gotta have love... love, love, love
And you'll find life... la, la, life
And once you've lived... lived, lived lived
It'll go to show it's not about who you are, but all about who you know, and I know Him. And He is love In this
world, true love rarely shows
What we lack is something real
We live through dreams, infatuated feelings and fantasies
Yeah, boys will be boys, and girls will be girls Oh, but you gotta have love... love, love, love
And you'll find life... la, la, life
And once you've lived... lived, lived lived
It'll go to show it's not about who you are, but all about who you know, and I know Him. And He is love We're
all lost and lonely; we're all walking blind
In a world manipulating our heart and soul and mind
We live in deprivation of what is true in life; too numb on medication to feel that we're deprived
Deep down there's something missing; our empty hearts won't heal
Until You come in and fill that spot that only You can fill
Our callused eyes will open, our natured minds will close
And we'll see truth in life, and all because of love You gotta have love... love, love, love
And you'll find life... la, la, life
And once you've lived... lived, lived lived
It'll go to show it's not about who you are, but all about who you know, and I know Him. And He is love You
gotta have love... love, love, love
And you'll find life... la, la, life
And then once you've lived... lived, lived lived
It'll go to show it's not about where you've been, but all about where you go, and if you go to Him, you'll find
love
