She Was

Seven Lions

[Shaggy 2 Dope]Woo hoo
You shoulda seen her
Man, her fid in my hand heavy sweatin' like a fever
The way she cut through flesh, she was beautiful
Her grace and finess had my love incurable
Little red beady marks trickle down her closed eyes
Whenever there's static she'll make it all right
She was there, never saw me out
Hand on my bidness
Until that day
The court provided a witness
[Anybody Killa]She was like the moon
The stars, the rain, the heat from the sun
Any fucking thing you could imagine
I was so upset when her ass left
I hunted her down at put three in her chest
Wrapped the body up put her in the ride and drove it home
To find a resting place so her soul can roam
What kinda girl could make a man just crack
The bitch really has to be all that
She was

[Chorus]She was something I'll never forget
I don't really miss her though
Now she's gone and never coming back
She was
She was something I'll never forget
I don't really miss her though
Now she's gone and never coming back
[Violent J]Blind date, she was alive when I got there
Dead when I left
I shut her throat down, squeezed all the air out her neck
She fought back, scared with a deep fear in her eyes
Until they rolled into the back of her head and she died
I gripped her by the ears slamming her skull off the floor
Till they ripped right off her head, I bolted for the door
Started to cry I forgot to kiss her goodbye
I turn around to go back in and keep reliving the lie
She loves me

[Jamie Madrox]She's like a ride on a roller coaster
Filled with many ups and downs
And did everything just to get
