

Beehive

Hundreds

I convinced myself
To shout it out
Everything's running through
Through myself
There is no hold for me
And I moved
Out of my head
Out of my sight
Like a stream, carrying
Everything away
The flood is running into
My opened mouth
It's leaking out my neck
It goes down my spine Gimme a break
Gimme a word
Occupy me and go far
Far away, far away
From where it once began
Multiply it and forget
What it was, what it was
Before No hunting eye is able
To look into me
Pulled myself up here
By my own hair
I made a thought stay
This I celebrate
Something real hard
Feeling all soft
Let me know, if you found
A better place
I want to come, follow you
Be with you
We can calm down
We can share a view
Gimme a break
Gimme a word
Occupy me and go far
Far away, far away
From where it once began Multiply it and forget

What it was, what it was

Before
